

The Older Cat

Dan Poynter

While this book is about decline, it is not negative. It will help you to recognize the early signs of winding down so that you can take measures before much organ damage occurs. Those measures may be chemical, surgical, naturopathic, a change in environment or a combination of them. Thanks to careful health monitoring by guardians and advanced veterinary care, the lifespan of the housecat is increasing dramatically. Your veterinarian is your partner in maintaining your cats health and increasing its longevity. You can help your partner by closely monitoring your cats behavior and making a written record. Early detection is the best protection against disease. Death is inevitable but it can be postponed. You are the first line of defense in fighting feline health disorders. This book will alert you as to what to expect and aid you in making difficult decisions prior to, and after, death.
